

NANDA KISHORE

Technical Product Manager | Platforms, APIs & Cloud

Hyderabad, India | +91 95150 39090 | nanda.kishore.0398@gmail.com | [Portfolio](#)

PROFESSIONAL SUMMARY

Technical Product Manager with six years across AI products, enterprise banking and IoT retail products. Combines roadmap and requirements ownership with hands-on Python, FastAPI, PostgreSQL and Azure experience, including delivery of an AI-assisted product from concept to cross-platform beta in five months.

CORE SKILLS

Technical Product: Platform strategy, API contracts, technical requirements, system workflows, roadmaps, prioritization and release planning

Cloud & Data: Azure, Azure OpenAI, PostgreSQL, product telemetry, CI/CD, environment management, reliability and privacy

Engineering: Python, FastAPI, REST APIs, asynchronous services, React, TypeScript and Flutter

PROFESSIONAL EXPERIENCE

People Signals Ltd | London, UK

Co-Founder & Director - Product and Technology | Nov 2024 - Present

Behavioral technology startup developing BERT, an AI-assisted product for understanding and communicating workplace behaviour.

- Owned product and technical delivery of BERT across Flutter, FastAPI, PostgreSQL and Azure, taking the product from final concept to iOS and Android beta in five months.
- Defined API behaviors and server-owned workflows for passwordless onboarding, adaptive assessment, report generation, secure sharing and user feedback.
- Separated deterministic behavioral scoring from Azure OpenAI-assisted narrative generation, balancing output quality, reliability, privacy, cost and delivery speed.
- Established isolated DEV and UAT environments with Azure DevOps pipelines, enabling repeatable environment-specific deployments and separated user data.
- Defined telemetry across onboarding, assessment progression, report generation and failures to support operational diagnosis and product decisions.
- Delivered TestFlight and Google Play beta readiness, including reviewer access, privacy disclosures, deletion workflows and production-support considerations.

Enough Stores Retail Ltd (StokBox) | London, UK

Software Engineer | Mar 2022 - Mar 2024

UK sustainable-retail startup building StokBox, an IoT-enabled dispensing platform.

- Converted the sustainable retail journey into modular web, API and device workflows spanning customer setup, product selection and dispensing.
- Defined integration behavior across Flask services, persisted product data and embedded hardware components.
- Coordinated product, operations and hardware stakeholders through implementation and validation while rapidly learning an unfamiliar IoT domain.

Temenos | Hyderabad, India

Associate Engineer | Jun 2019 - Nov 2020

Global banking-software provider supporting enterprise digital-banking journeys.

- Delivered reusable mobile components and Java/SOAP service integrations for enterprise digital-banking products.
- Investigated performance defects and supported functional analysis, implementation and release readiness.

Associate Trainee | Jun 2018 - Jun 2019

- Developed reusable UI components and customized digital-banking journeys.
- Contributed to testing, code review, backlog refinement and sprint delivery within an Agile team.

EDUCATION

MSc Advanced Computer Science with Industry Placement - Distinction | University of Leicester, UK | 2023

B.Tech Computer Science and Engineering - GPA 9.64/10 | B.V. Raju Institute of Technology, India | 2019
